TUBE INDIA INTERNATIONAL 2016

7th All Indian Exhibition & Conference for the Tube and Pipe Industries

METALLURGY INDIA 2016

6th International Exhibition & Conference on Metallurgical Technology, Processes, Material Handling and Services

WIRE & CABLE INDIA 2016

6th International Exhibition for the Wire & Cable Industry

INDIA ESSEN WELDING & CUTTING 2016

7th International Trade Fair
Joining-Cutting-Surfacing

Date: October 05 -07, 2016

Venue: Bombay Convention & Exhibition Center, Mumbai

A strong quartet: Metallurgy India, Tube India International and Wire & Cable India will be held concurrently with INDIA ESSEN WELDING & CUTTING from 05-07 October 2016 at the Bombay Convention & Exhibition Center in Mumbai. On display at India's largest fair platform spread over 30,000 sqm, over 500 exhibitors from 25 countries. The metals fair will have technology highlights from the metallurgy, wire and cable and tube industry as well as from the industrial areas of cutting and welding.

On display at Wire & Cable India will be machines and plants for wire production and processing, forming technology, spring-making technology, cable and stranded wire machines, tools and auxiliaries for process engineering, measuring and control technology, all types of wires, rolled wire, bare wire, bars, sheet metal as well as special wires and cables.

In addition to the exhibition a conference on Polymers in Cables and Wires (PCW 2016), jointly organized by Messe Düsseldorf India & Color Publications Pvt Ltd will be held on 7th October 2016. This one-day conference is an attempt to look at the entire manufacturing and application supply chain for the use polymers in cables and wires, and harbour a better understanding of better practices and newer products therein.

Tube India International presents the complete range from tube production to tube processing as well as the tube trading segment. The spectrum includes raw materials, tubes and accessories, tube manufacturing machinery and used machinery as well as tools for process engineering and auxiliaries, measuring and control technology. The International Tube Association (ITA) together with its India Chapter will once again organize a technical conference on "Innovative Solutions for Global Competitiveness in Tube and Pipe Manufacture" on 7th October 2016. This conference will provide a

window for all involved with the tube and pipe industry to take a look at current and emerging global practices and trends in design and manufacturing technologies in this field.

Metallurgy India presents the entire portfolio of the metallurgical industry with electrical and automation technology systems. Together the three trade fairs cover the complete spectrum of metal working and processing. A parallel conference on “Indian Steel Industry: Emerging Technologies & Challenges in the post Meltdown Era” will be organized jointly by the Steel & Metallurgy Magazine & Messe Düsseldorf India on 5th October 2016.

The spectrum of subjects at India Essen Welding & Cutting will extend from plants and equipment for joining, surfacing and cutting processes via thermal spraying right up to data processing as well as automation processes. Moreover, the DVS will once more support the specialist conference “International Welding Symposium (IWS 2K16)” staged by Indian Welding Society. The conference promotes the exchange of knowledge between manufacturers, users and researchers.

Conceptual and technical support for the Indian metal fairs is being given by the international associations IWCEA (International Wire and Cable Exhibitors Association), IWMA (International Wire & Machinery Association), ACIMAF (Italian Wire Machinery Manufacturers Association), WCISA (Wire and Cable Industry Suppliers Association) USA and ITA (International Tube Association).

The Indian associations SWMAI (Steel Wire Manufacturers Association of India) and AIWMA (All India Weldmesh Manufacturer’s Association) are also at hand with their country-specific insider know-how. For further information on the Indian trade fairs Wire & Cable India, Metallurgy India, Tube India International and India Essen Welding & Cutting visit the relevant web portals: www.wire-india.com, www.tube-india.com, www.metallurgy-india.com and www.india-essen-welding-cutting.com or [contact the below mentioned contact person:-](#)
